WORKING ON THE WATER

CONTENTS 1995-2

* Fishing for life

* Keeping track

New engine maintenance management program helps the North Carolina Ferry System keep 24 boats running on schedule.

* Depend on your mechanic

This Cat D333, predecessor of today's stalwart 3306, ran a conservatively estimated 200,000 hours before retiring.

* Staying power

Our mechanics receive the best available training to stay on top of their craft. Yours can get expert training too.

* The power of containment

New shipyard hull refinishing technology aims to improve speed and quality while lessening environmental impacts.

CONTENTS

1995-1

* Shrimp Power

Twin setup adds power, maneuverability and security

* Working smart – Electronics need new iron

New 3516Bs repower sister tugs, gaining 1,250 hp and 18,600 lb of bollard pull while improving emissions.

* Operating right – we are working smarter

Skillful planning, piloting, and engine protection programs play important roles in lowering operating costs.

* Oil management

Use the best oil, superior filtration, and scheduled oil sampling to manage your lube oil and extend engine life.

* Flexible financing

Whether you're fishing for gulf shrimp or upscale vacationers, Cat Financial understands the needs of marine businesses.

WORKING ON THE WATER

CONTENTS 1994-2

- * Top of the charters

Cat power takes customers farther faster, after bigger fish

- * Working the locks

Cat power helps the U.S. Army Corps of Engineers keep commerce moving.

- * Help with torsionals – Ensure vessel reliability

Cat dealer experts and Caterpillar Technical Service engineers help you keep technological gremlins at bay.

- * Fuel for thought – New fuels need new oil

Fuel system maintenance is simple with proper fuel selection, filtration, and monitoring.

- * Easy as 1,2,3

Cat power helps this heavy-duty trawler go farther, fish deeper, and return with a cool catch.

WORKING ON THE WATER

CONTENTS 1994-1

* Gusty gillnetters

Fishermen need speed, reliability and service

* Ready to run

- New power option Cat 3176 B

Long-range tuna charter repower reels in reliability, fuel efficiency, and quiet gen sets. Also, a first look at the new Cat 3176.

* Get it right the first time

With a little up-front effort, you can eliminate most potential problems that can be encountered over the life of your engine installation.

* Bridging the Severn

Four laser-guided, computer controlled, 2,000-hp thrusters place bridge foundation caissons with pinpoint accuracy.

* Rx for power problems

Cat mechanics have the training, tools, parts, and dedication needed to get your boat out of a bind.
